Nellee Chair

The arch is one of the oldest structural forms there is — it carries weight by curving, not by bracing. Nellee borrows that logic and softens it. The backrest rises to a full dome, the upholstery runs unbroken to the floor, and four thick columns hold the whole thing up without a visible frame, a joint, or a single hard edge. Bouclé over dense foam on a steel structure: soft from across the room, solid at the table. Covers lift off for cleaning.
