- (C) Back Cushion 3x
- (D) Side Cushion 2x

Place Frame (E) upright on a flat, clean surface with the open top facing up. Verify the base grid is level and stable.

Step 3 - Add the three seat tops

- Place the three Seat Cushion Tops (A) on top of B, positioned left, center, and right.
- Push them back until they touch the rear rail. Keep gaps even.

Step 4 – Fit the side cushions

- Insert both Side Cushions (D) vertically against the inside of each arm.
- Seams/piping face outward toward the chrome rails.
- Press down so they sit snugly on the seat pads.

Step 5 – Insert the back cushions

- Place the three Back Cushions (C) along the back from left to right.
- Press each down and slightly back so they lock the side cushions and sit level with the top rail.

Step 6 – Align and square

- Check top edges are even with the rails.
- Seat tops (A) are straight with consistent spacing.
- No corners are tucked or twisted.

Step 7 – Final check

- Sit briefly, then re-square any shifts.
- Ensure the long bottom pad (B) hasn't crept forward; if it has, push it back so all seat tops touch the back cushions.
