Flair O 'Armchair

Emerging from Italy's early 21st-century design movement, the Flair O' Armchair captures the forward-thinking spirit that defined modern furniture. Its fluid, architectural curves, and sculpted silhouette reinterpret the traditional dining chair as an object of modern art and comfort. Built on a tubular-steel frame and upholstered in refined Kvadrat™ fabric, it combines resilience with tactile luxury. The swivel base, crafted from steel laminate and aluminum extrusion, adds effortless flexibility, while the cold-moulded polyurethane foam ensures lasting comfort.

MATERIALS:

| | |
|-------------|---------------------------------------------------------------|
| Frame: | Tubular steel and steel profiles |
